PROFILE

Software Development Engineer with over 15 years of experience designing, implementing and supporting software solutions in various domains: finance, insurance, healthcare, energy, and automation. Extensive experience includes programming in Java, JavaScript, Groovy, NodeJS, Python and other programming languages, as well as work with Spring and Spring Boot, Quarkus, ME(AR)N (Mongo Express React/Angular NodeJS), Docker, Kubernetes, Apache Camel, OSGi and other frameworks and tech stacks. Throughout my career I had to learn new environments, tools, libraries and perform roles ranging from Solution Architect to DevOps Engineer. Current areas of interest include micro-service and streaming data architectures, on-premise cloud and hybrid deployment models, domain specific languages.

- Delivered code and performed code review
- Provided guidance and shared technical knowledge with junior developers, related to cloud technology, aspects of configuring CI/CD or choosing data structure/algorithm for implementation
- Delivered technical design/documentation working as a mediator between developers and product owner
- Lead teams of developers and QA engineers navigating between DevOps routines and POC implementation to clarify technical requirements
- Have prepared interviews strategies and conducted technical interviews with students on campus and with experienced professionals

TECHNICAL SKILLS

- **Programming:** Java, JavaScript/TypeScript, Groovy, Python, C#/F#, Clojure, Ruby, C/C++
- **DevOps:** Linux Shell, Github Actions, Google Build, Gitlab CI/CD, Jenkins, Maven, Gradle, Git, Mercurial, Terraform
- **Cloud**: Google Cloud (GCP), Amazon Web Services (AWS), Azure, OpenShift
- **Virtualization:** AWS ECS, Docker, Kubernetes, VirtualBox
- **Database:** MySQL, Mongo, DynamoDB, Redis, MS SQL, Oracle, SQLite, Berkley DB.
- **Technologies:** Spring and Spring Boot, Kafka, Quarkus, Liferay, Apache Camel, SOAP and REST APIs, OSGi, JBoss Drools, iBatis, Hibernate, JNI, Swing, SWT, Java 2D, RMI, EJB, JTA, JMS, JNDI, JDBC, JSP, Servlets, XML-RPC, XML, XSLT, XPath, JAX-RPC, WSDL4J, Axis, Hibernate, JBoss Drools, Websphere 5/6, JBoss AS, IBM Websphere Process Server, IBM BPM.
- **Web:** React, AngularJS, Webpack, HTML5, CSS3, Less, SASS

CERTIFICATION

- AWS Certified Cloud Practitioner (CLF-C01)
- Sun Certified Programmer for Java (CX-310-035)
- Sun Certified Web Component Developer (CX-310-081)

EDUCATION

- M.Eng. 2007 Industrial Engineering, Lehigh University
- B.Eng. 2004 Automated Control Systems, Perm State Technical University

BOOKS

Instant Apache Camel Messaging System, *Packt Publishing*, 2013, ISBN 9781782165347

PROFESSIONAL EXPERIENCE

CRIO, Inc – Remote
Oct 2022 – Nov 2023

Senior Software Development Engineer

Work in an agile team developing world class platform for clinical research data management. Primary infrastructure is designed to be based on K8s and Google Cloud services. Work includes support of existing Java based applications and transitioning them onto a micro-services and Cloud first based architecture.

- Coding and development of the application in K8s cluster and in the GCP cloud.
- Design and architecture of the platform and its components.
- Technical support of services and applications
- Contribution to code review and design sessions.
- Collaboration with product leadership and UX to understand the needs of the business
- Organization of the testing and release process.
- **Skills:** Google Cloud Platform; Kubernetes; Docker; Spring Boot; Java; NodeJS; Kafka; React; HTML5; jQuery;

Audacious Inquiry – Baltimore, MD

Lead Software Engineer
Mar 2021 – Sept 2022

Development, support and maintenance of PULSE (Patient Unified Lookup System for Emergencies) and Gateway (data exchange with National Network for Electronic Health Records exchange) platform. The platform is based on multiple applications and services deployed in AWS cloud and leveraging its functionality combined with responsive modern UI/UX, SSO and integration with National Network, third party services.

- Hands-on code delivery
- Turning Product manager and product owner visions for the applications into a detailed technical documentation
- Architecture and design documentation and DevOps for cloud infrastructure and CI/CD
- R&D work, Proof-of-concept implementation and providing direction and support for the development team
- Integration and testing from QA to testing connectivity with third-party services (Data-Dog, Surescripts, eHealthExchange, etc)
- Responsible for Level 3 customer and applications support.
- **Skills:** Node.js, Java, Spring Boot, .NET Framework, MySQL, Terraform, AWS (SQS, SNS, ECS, RDS, DynamoDB, Lambda, S3), Continuous Integration and Continuous Delivery (CI/CD), Fast Healthcare Interoperability Resources (FHIR), HL7 Standards, XML

Senior Software Engineer
Mar 2019 – Mar 2021

Development and support of modular based application platform for connected healthcare - ULP (Unified Landing Page). This platform was leveraging Liferay OSGi and portlet architecture to bring highly customizable applications to the clients - HIEs, providers and payers, integrating it into their software stack as well as provide best user experience and integration via SSO.

- Hands on code delivery and code review for code in the back-end
- R& D and delivery of design documents for new features, in particular, leveraging portlets and OSGi architecture.
- Quality tests and Improvements in CI/CD process and transition from on on-premise type deployment to a cloud (AWS) deployment.
- Support and troubleshooting of the issues submitted by the customers and internal users
- **Skills:** Java, Spring Boot, Liferay, OSGi, Shell Scripting, Docker, Node.js,MySQL, JavaScript, HTML5, CSS

Avanade (Infusion before 2017) – Raleigh, NC **Aug 2014 – Mar 2019**

Senior Consultant

Design, documentation, hands-on code development and code review. Major project meta-data driven, highly configurable platform for all aspect of life insurance underwriting for Metlife subsidiary in Japan (Alico). Worked directly on the SWAT Applications Team - small team of talented developers that reports directly to the CIO for Rapid Application Development.

Helped to augment recruitment processes in MetLife for growth and promotion of tech culture across the organization, conducting over 100 technical interviews with developers to senior technical architects and leads.

- Implementation and maintenance of the configuration application (Composer) using Node.Js, AngularJS, React and Mongo
- Design and architecture of the back-end utilizing reactive streams (Reactor) to achieve better performance and scalability.
- Design and implementation of application Groovy scripting, testing frameworks, loading and data migration tools.
- Management of development and CI process through JIRA, Jenkins, Docker, Stash, VSTS
- Education and training of engineering teams; technical interviewing of candidates for Metlife and Infusion and recruitment on campus (UNC).
- **Skills:** Mongo; Java; Spring, Reactor, Groovy; JavaScript; NodeJS; Docker; Shell Scripts; AngularJS; React; HTML5; Less; JIRA

Stone River, Inc – Orlando, FL **Apr 2013 – Aug 2014**

Senior Software Development Engineer

Supported and developed a software product for mid-size workers comp insurance companies. Performed front-end and back-end development, customer support, testing and release using automation tools.

Tech: Websphere AS 7; JBoss 5, 6; Wildfly 8; AS/400; MS SQL Server; Java; Hibernate 3.5; Python; HTML5; JavaScript;

Click2Interact – Orlando, FL **Sep 2012 – Jan 2013**

Developer

Designed and implemented teacher-parent communication application for child development centers and pre-schools. Full-stack development using Ruby on Rails framework, JavaScript and Clojure.

Tech: Ruby On Rails 3.2, MySQL, RESTful Web-Services, Rackspace Cloud, jQuery, Twitter Bootstrap,

Prognoz – Perm Russia — Mar 2012 – Jul 2012

Software Engineer

Wrote code for an 'Electronic Government' platform based on IBM BPM and end-user web-application using GWT. Full-stack development with a strong focus on REST web-services and development for BPM.

Tech: Java 1.6, GWT, JPA 2, Web-Services, IBM Websphere Process Server and IBM BPM 8

Marlabs – Orlando, FL — Mar 2007 – Dec 2011

Consultant/Programmer Analyst

Worked as a consultant on multiple projects at Siemens Shared Services (division of Siemens) developing custom vendor management application, documents management application, FileNet migration tools, scan and recognize application, application for customs compliance control; and at Team Disney, where I was involved in the project refactoring and improving existing system for bookings and reservations.

Tech: Java, RAD 7.5, Eclipse, Spring 2.5, Drools, SQL Server 2000/2005, Oracle 10g, WebSphere 5/6, JBoss AS, EJB, Apache Axis, Apache Camel, Apache iBatis, JavaScript, jQuery, CSS, HTML, XML/XSLT, JSF, Struts, Ant, ClearCase, Subversion, AIX, Shell/AWK/Sed scripting, Perl, Python, soapUI

Fermi National Accelerator Lab – Batavia, IL — 2001, 2002, 2004, 2005

Engineer, Research Assistant

Multiple internships, then engineer level position at the high-energy physics project in National Lab. Design and implemented tools and applications used for data acquisition and hardware control as part of international collaboration for Large Hadron Collider (LHC) experiment (United States team worked on the Compact Muon Solenoid (CMS) part - building alignment system for muon detector).

Tech: Java 1.4, C/C++, ROOT, Swing, HSQL, Hibernate, XML-RPC, Python, Shell scripting

InfoTelecom LLC – Perm, Russia — Oct 2003 – Jul 2004

Software Developer

Developed product software product - highly customizable system of web-traffic statistics and monitoring with charts, graphs and diagrams dashboard, custom made website templating and FTP based deployment. Wrote code for Oracle SPs using PL/SQL and Java.

Tech: Java 1.4, Java 2D, ImageIO, Oracle AS, Oracle 11g, PL/SQL, Shell Scripting, JavaScript

iTech Software – Perm, Russia — Oct 2002 – Sep 2003

Software Developer

Developed software for telecommunication company managing payphones. Wrote high-level and low-level code using C and Java. Developed custom network protocol.

Tech: Java 1.3, JNI, C/C++, JSP, JDBC, MS IIS, Interbase
